

Fold a paper square in half, then over again so you get a *small* square, and then diagonally along the line you see in the graphic above.

Cut along the red lines as marked in the row of diagrams to the right ...

... then unfold again to admire your new star / snowflake / frost flower.

Try different materials, including tissue paper, shiny metallic foil, magazine pages with interesting color combinations and so on.

Put the stars on cards, envelopes, window panes, include them in letters ...
